

About Me

A relentless problem-solver with a deep passion for coding and innovation. I constantly explore how technology can reshape the way we interact with the world.

My curiosity drives me to experiment, build, and push boundaries—whether it's crafting intelligent systems, optimizing algorithms, or simply finding new ways to automate the mundane.

Creativity fuels my approach to problem solving. I love turning abstract ideas into functional solutions, and I thrive on the challenge of making things work in smarter, more efficient ways. For me, learning is a never-ending process, and I'm always eager to dive into new technologies, take on ambitious projects, and explore the unknown.

SKILLS

Programming:

Well versed in C, C++, Python, Java, SQL

Development:

Game Development, Search & File Management Automation

Education

MODERN SCHOOL VASANT VIHAR

Batch of 2023

10th : 92.5% and 12th : 95%

School topper in Chemistry

Included in the school Merit List

AMITY UNIVERSITY NOIDA

Bachelor of Technology

Computer Science and Engineering

Academic Scholarship Awardee

Achievements & Leadership

National-Level Football Player – Former School Captain & Vice-Captain of Delhi State Team

Best Athlete of the Year (3x) – Recognized for outstanding sports achievements

Winner, Badminton Zonals

Vice President, School Computer Science Club

Organized & hosted an interschool coding competition

Projects

Automated Phrase Search Tool

Created a program that scans an entire laptop for a specific phrase in files and opens each occurrence in a new tab

Mastermind Game

Developed a logic-based game implementing interactive gameplay mechanics.
